Summary

Motivated and detail-oriented Computer Science student at Bunker Hill Community College with a strong foundation in programming, software development, and embedded systems. Proficient in Java, Kotlin, Python, C/C++, and Assembly Language, with hands-on experience in Android development and embedded Linux. Seeking an internship as an Embedded Systems Software Developer to apply technical skills and contribute to innovative projects.

Skills

- **Programming Languages:** Java, Kotlin, Python, C/C++, Assembly Language
 - **Software Development:** Android SDK, Object-Oriented Programming/Design
 - **Databases:** MySQL
 - **Embedded Systems:** Embedded Linux
 - **Tools & Platforms:** Git, Linux, IDEs (IntelliJ, Android Studio, VS Code)
-

Education

Bunker Hill Community College – Charlestown, MA

- **Associate of Arts (AA) in Computer Science** (Concentration)
March 2025 – Present
- **Associate of Science (AS) in Information Technology** (Transfer Option)
Present
- **Certificate in Object-Oriented Programming/Design**
Present

Relevant Coursework:

- Software Development
 - Embedded Systems
 - Database Management
 - Programming Fundamentals
-

Work Experience

Quality Build – Massachusetts, MA

Present

- Collaborated with teams to develop and maintain software solutions for construction projects.

The Home Depot Inc – Massachusetts, MA

Present

- Provided technical support and troubleshooting for hardware and software systems.

Lowe's Home Improvement – Massachusetts, MA

Present

- Assisted in inventory management and system optimization.
-

Projects

[Add a brief description of any relevant projects you've worked on, e.g., Android apps, embedded systems projects, or software development initiatives. Example below:]

- **Android App Development:** Designed and developed a task management app using Kotlin and Android SDK, integrating MySQL for data storage.
 - **Embedded Systems Project:** Built a temperature monitoring system using C/C++ and embedded Linux on a Raspberry Pi.
-

Organizations

STEAM – *Present*

- Actively participate in initiatives promoting Science, Technology, Engineering, Arts, and Mathematics.

2024 NASA Minds – *Present*

- Collaborate with peers on projects and challenges related to space technology and innovation.

Languages

- English (Fluent)
- [Add any other languages you speak, if applicable]

Interests

- Embedded Systems
- Software Development
- Open-Source Projects
- Robotics
